

What is the unit of measurement for a distribution box

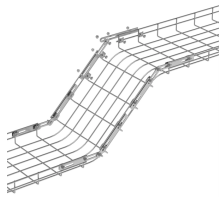

Overview

The Unit of Measure (U/M) defines the measurement of the Unit of Issue. Example: The U/I is one package of material; each package of material contains twelve rolls (QUP), and each roll is three feet long which is the U/M. Back to Top This section explains the measurement points of the enclosures of distribution boards, switchboards, control panels, and cubicles (which require short delivery times and improved quality) as well as the problems related to these measurements. It also introduces example solutions to measurement. The UOM codes reproduced below are used in the Advanced Shipment Notice, Invoice, Item, and Purchase Order documents. It includes specifications for TOP-TS, TOP-TF, TOP-LS, TOP-PS, TOP-PF, and TOP-S distribution boxes that range from 1-way to 36-ways. They help keep everything inside safe and working properly. Picking the right size matters. For DLA DoD contracts, the DoD UI Codes will be used, not commercial UI codes.
