

What kind of cable tray is the white cable tray

Overview

Perforated cable trays have small holes or slots to accommodate flexibility and ventilation in wire arrangements. The white finish helps in areas where aesthetics are crucial, such as in offices or store facades. Special Safe-T-Edge: protects installers from sharp ends while it prevents cables from fraying. Wire mesh is smooth and round: to resist dirt and dust build-up. Each cable tray type performs a different function and comes in various materials such as aluminum. “A cable tray is a cable tray—why are there so many types?

” The answer is simple: different cable characteristics and installation environments demand different tray designs.
