When will the Global Energy Interconnection be proposed

The coming years are critical. At COP30 in Brazil this November, countries can act on their commitment to triple global renewable energy capacity and double energy efficiency by 2030.

In response to new changes and trends, President Xi Jinping proposed a new energy security strategy aimed at revolutionizing consumption, supply, technology, and institutions, while ...

Speaking at the 2025 Global Energy Interconnection Conference in Beijing, Han said the global energy system is undergoing profound changes, while noting that China has long been a ...

In 2015, Chinese President Xi unveiled a new initiative known as the Global Energy Interconnection (GEI). The GEI aims to connect renewable energy producers to consumers through ultra-high ...

Han recalled that in September 2015, Chinese President Xi Jinping delivered an important address at the United Nations Sustainable Development Summit, where he proposed building Global Energy ...

At the national level, GEI construction will promote the achievement of NDCs for all countries.

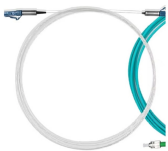

In response to new changes and trends, President Xi Jinping proposed a new energy security strategy aimed at revolutionizing consumption, ...

Design of modern Energy Management Systems (EMS) and Distribution Management Systems (DMS), their applications to support energy connectivity and global energy interconnection

In 2025, Hitachi Energy will provide high-voltage direct current (HVDC) equipment for the world's first UHV flexible DC transmission project, 800 kV Gansu-Zhejiang link, designed and built by ...

This report investigates China's proposal for a Global Energy Interconnection (GEI), an eighteen-line ultra-high voltage (UHV) network linking over 80 countries with renewable energy and ...

An expert from the Multilateral Cooperation Center for Development Finance (MCCDF) shared insights on promoting high-quality cross-border energy connectivity infrastructure investment during a panel at ...

The Global Energy Interconnection is a proposed global electricity network (Super grid).

Discussions will showcase technologies, standards, and management practices that support the construction of new power systems and the green transformation of ...
