

Why the Spectrum Splitter Was Used Illegally

Overview

Drawing on old-school methods to splice cable TV lines for unauthorized use, hackers say they can buy a splitter at the local electronics store and easily run an additional line from the cable modem line for the computer into the television. A splitter is a device used to split a cable signal between two or more devices. The splitter should only be used if the outlet will be. The US government, with assistance from major telecommunications carriers including AT&T, has engaged in massive, illegal dragnet surveillance of the domestic communications and communications records of millions of ordinary Americans since at least 2001. Since this was first reported on by the. They don't really do physical disconnects anymore. The equipment does that for them with a few clicks on their system, so tell your irate gf or whom ever cut it they have problems., an AT&T Broadband customer, dropped his subscription to DirecTV several months back, he joined a small but growing group of cable TV.

Why the Spectrum Splitter Was Used Illegally

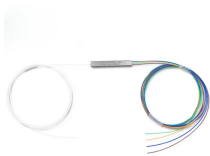

As to stealing services, most cable companies are digital and encrypted which requires a box at a device so stealing cable is not like it used to be. The bigger risk is you do it wrong and cause...

They have since came by at least once to fix and issue and never said anything. The fact is, if they want to disconnect you they would put a filter on the line or cut the line so you cant use it.

Not sure if it would be illegally restoring service to to make sure the supply line is still connected and typically this wouldn't be done unless requested either by the homeowner or by the provider (due to ...
